

INDUSTRIAL PRODUCTS

ISO 13485 | TS 16949 | Class 10,000 Clean Rooms

Light Fabrications has been a converter/fabricator and distributor of flexible materials and custom adhesive components since 1977. We are an industry leader in designing, prototyping, and manufacturing engineered products for industrial, transportation, medical, aerospace, solar, appliance and endless other applications.

Our capabilities include:

- Laser cutting
- Die-cutting
- Laminating
- Servo rotary
- Slitting
- Spooling
- Clean room assembly

and many other services for customers worldwide.

We stock hundreds of materials used for:

- Bonding
- Attaching
- Sealing
- Masking
- Protecting
- Shielding
- Conducting
- Gasketing

and more.

Our value-added product solutions help customers solve form and function needs & reduce cost and assembly time. All adhesive backed products can be produced with a split-back liner or extended tabs for easy removal and fast peel and stick assembly. Finished parts are supplied in rolls, pads, or loose pieces or individually custom packaged to your specifications.

We operate from a modern, 115,000 sq. ft. facility in upstate NY. We pride ourselves with a reputation for quality, service and integrity. Our friendly, technical staff will quickly solve your need with a product solution that improves your design and cuts assembly cost. Contact us today
